Portfolio: raheemportfolio.netlify.app

Detail-oriented and technically skilled **Junior Software Engineer** with a strong foundation in **full-stack web development**, specializing in **ReactJS, NodeJS, TypeScript, and databases (MongoDB, MySQL, PostgreSQL, Sequelize, GraphQL)**. Adept at building **scalable and user-friendly applications**, integrating frontend and backend technologies to create seamless user experiences. Possessing strong **problem-solving and analytical skills**, Experienced in **Agile development, collaboration, and version control (GitHub)**, ensuring high-quality code and efficient teamwork.

Technical Skills:

Frontend – HTML5, CSS, **JavaScript**, Tailwind CSS, **ReactJS**

Backend – MongoDB, ExpressJS, NodeJS, **TypeScript**, MySQL **PostgreSQL**, Sequelize, GraphQL, **Python**

Selected Related Experience:

Candidate Search: https://github.com/rs0579/candidate_search

- Developed a candidate search feature that displays candidate details, including name, username, location, avatar, email, profile URL, and company information.
- Implemented functionality to save candidates to a list of potential hires using a "+" button, advancing to the next candidate.
- Designed logic to skip candidates without saving using a "-" button, ensuring seamless browsing.
- Created a notification system to indicate when no more candidates are available for review.
- Built a potential candidates page displaying previously saved candidates with persistent data across sessions.

Tools/Languages: ReactJS, NodeJS, TypeScript

Employee Tracker: https://github.com/rs0579/employee_tracker

- Developed a command-line application to manage company departments, roles, and employees with an intuitive user interface.
- Implemented features to view all departments, roles, and employees in a structured, formatted table.
- Designed interactive prompts for adding new departments, roles, and employees, ensuring seamless data entry and database integration.
- Built functionality to update employee roles by selecting an employee and assigning a new role.
- Ensured persistent data storage and retrieval for efficient company resource management.

Tools/Languages: TypeScript, MySQL PostgreSQL, NodeJS

Additional Experience:

Outlier AI

French AI Writing Evaluator (Tier 2)

10/2024 – present

Remote/Freelance

- **Tech-Savvy & Detail-Oriented:** Developed and refined AI-generated content using **NLP tools**, ensuring clarity, coherence, and brand consistency.
- **Data-Driven Problem Solver:** Monitored content performance and leveraged **analytics** to optimize engagement and effectiveness.
- **Collaboration & Agile Workflow:** Worked with **cross-functional teams** to integrate AI-generated content into marketing strategies.
- **AI & Process Improvement:** Trained and provided feedback on **AI models**, enhancing language accuracy and contextual understanding.

University of Versailles Saint-Quentin-en-Yvelines

Maître de Langue/ Lector

09/2021 – 08/2024

Guyancourt, France

- **Adaptable & Detail-Oriented Educator:** Designed and delivered structured lessons, developing students' analytical and problem-solving skills.
- **Curriculum & Assessment Development:** Independently created course materials, assignments, and exams to enhance learning outcomes.
- **Data-Driven & Organized:** Utilized Microsoft Excel for precise grade tracking and reporting, ensuring accuracy and efficiency.
- **Collaborative & Agile Mindset:** Fostered teamwork through project-based learning, aligning with Agile and Scrum methodologies.

Chewy, Inc.

Subject-Matter Expert

12/2019 – 07/2021

Dallas, Texas, USA

- **Detail-Oriented & Technical Problem-Solver:** Resolved PDA barcode scanner issues and optimized WMS software for efficient warehouse operations.
- **Project & Team Management:** Led induction teams to meet nightly production quotas, stepping in as interim lead when needed.
- **IT Systems & Process Optimization:** Managed departmental IT infrastructure, improving efficiency in order tracking and fulfillment.
- **Cross-Functional Collaboration & Training:** Coordinated with outbound teams for timely order completion and trained new team members to enhance retention.
